

Fire and Earthquake Safety

- Smoke detectors and fire extinguishers are installed throughout the school.
- The building is under 24-hour surveillance by a private security company.
- The school building has been surveyed by Technical University, Civil Engineering Department and has been approved for safety in the case of an earthquake.
- Earthquake boxes holding medical supplies, torches, blankets and food supplies are located in each classroom and extra bottled water kept in storage.
- School wide fire and earthquake drills are conducted regularly throughout the school year so that the children and staff know what to do in an emergency situation.
